

# VINEET JAGADEESAN NAIR

[vineet9@mit.edu](mailto:vineet9@mit.edu) | [vineetnair9.github.io](https://vineetnair9.github.io) |

## EDUCATION

**Massachusetts Institute of Technology** | PhD in Computational Science & Mechanical Engineering | **GPA:** 5.0/5.0 *Feb '21 - May '25*  
*Thesis:* Coordination of distributed energy resources for a reliable, resilient, and affordable decarbonized grid

**Massachusetts Institute of Technology** | SM in Computational Science & Engineering | **GPA:** 5.0/5.0 *Sep '19 - Feb '21*  
*Thesis:* Estimating cumulative prospect theoretic passenger behavioral models for dynamic pricing & transactive control of shared mobility

**University of Cambridge** | MPhil in Energy Technologies | Gates Cambridge Scholarship | First Class Honors *Sep '18 - Sep '19*  
*Thesis:* Optimal design & energy management of islanded, hybrid microgrids for off-grid communities in sub-Saharan Africa

**University of California, Berkeley** | **GPA:** 3.85/4.0 | Dean's Honors List | Phi Beta Kappa *Aug '14 - May '18*  
B.S. Mechanical Engineering (Honors), B.A. Economics | Distinction | Honor Societies: Tau Beta Pi, Pi Tau Sigma, Omicron Delta Epsilon  
Minor in Electrical Engineering & Computer Sciences | Certifications in Human-Centered Design & Entrepreneurship & Technology

**Programming:** Python, Julia, MATLAB/Simulink, Java, JAX, R, PyTorch, TensorFlow, Fortran, Git, STATA, LaTeX

**Reviewer for:** Annual Reviews in Control, Nature Scientific Reports, Reliability Engineering & System Safety, IEEE Conference on Decision & Control, IEEE Transactions on Control of Networked Systems, Journal of Energy Storage, IEEE Transactions on Control Systems Technology, IEEE Transactions on Automatic Control, International Journal of Electrical Power & Energy Systems, ACM e-Energy Conference, IEEE International Conference on Automation Science & Engineering, International Federation of Automatic Control World Congress, American Control Conference, NeurIPS Tackling Climate Change with Machine Learning Workshop

## RESEARCH EXPERIENCE

**Incoming Research Intern**, AI-based advanced control for electric vehicle power converters | TATA Motors, Pune, India *Dec '25 -*

**Incoming Research Intern**, AI for Shipping Decarbonization | Shell New Energies, London, United Kingdom *Aug '25 -*

**Research Intern for Sustainable Data Centers in MENA** | Catalyst Investment Management, Amman, Jordan *Jun '25 - present*

**Postdoctoral Research Associate** | MIT Mechanical Engineering & Schwarzman College of Computing *Jun '25 - present*

**Human Frontier Collective Specialist** | Scale AI *Jun '25 - present*  
Improving the capabilities of large language foundation models for control, optimization, and energy system applications

**Graduate Research Assistant** | Active Adaptive Control Lab, MIT Mechanical Engineering Department *Sep '19 - May '25*

- Advised by Dr. Anuradha Annaswamy, thesis committee: Prof. Andy Sun & Prof. Kamal Youcef-Toumi
- Applying optimization, game theory, machine learning & control tools to model power grids & electricity markets
- Designed new local market structures & algorithms to better coordinate & compensate distributed energy resources (DERs)
- Modeled dynamic pricing for shared, mobility-on-demand services using cumulative prospect theory
- Worked with external partners including Ford, Siemens, Shell, GE, PNNL, NREL, Dept. of Energy & Princeton University
- Managed global collaborations with faculty in Portugal, Spain, Switzerland, & Brazil
- Helped with proposal writing & coordination to secure \$4 million+ in grant funding from US DOE & MIT Energy Initiative

**Visiting Researcher** | Universidad Politécnica de Madrid, Madrid, Spain *Oct '23 - Dec '24*  
• Implement novel electricity markets & distributed optimization algorithms using blockchain infrastructure & smart contracts

**Computational Scientist PhD Resident** | [Google] X, the moonshot factory, Mountain View, CA *May - Dec '23*

- Built improved inverter models & power system simulators for the grid with Project Tapestry
- Applied scientific, physics-informed machine learning to enhance the speed & accuracy of transient dynamic numerical simulations
- Improved stochastic optimization model for power system planning with hydro & renewables to study value of battery storage

**Graduate Research Intern** | National Renewable Energy Laboratory (NREL), Golden, CO *May - Aug '22*  
• System modeling & digital real-time simulation for hardware-in-the-loop validation of optimization/control algorithms in power grids

**Research Consultant for Innovation Challenge** | Avangrid, Orange, CT *May - Oct '21*  
• Worked with Avangrid's Smart Grids Innovation team to implement a distributed energy resources management system (DERMS) pilot  
• Developed a hybrid/federated software architecture & decision-making method for DERMS, to enhance cybersecurity & interoperability

**Research Intern, Artificial Intelligence/Deep Learning for Smart Grids** | Siemens, Princeton, NJ May - Sep '20

- Developed a bilevel optimization framework & market mechanism for grid integration of DERs along with demand response

**Graduate Student Researcher** | Control Group, Cambridge University Engineering Department Nov '18 - Aug '19

- Researched the optimal design, energy management, dispatch, & control of hybrid, islanded microgrids, supervised by Dr. Ioannis Lestas

**Honors Undergraduate Researcher** | UC Berkeley Jan '17 - May '18

- Advised by Prof. Duncan Callaway, Prof. Kameshwar Poolla, & Prof. Claire Tomlin
- Designed & prototyped low-cost energy monitors, scaled up to produce 80+ units for field trials in Nicaragua
- Researched user incentives & programmed sensor networks to optimize electricity use & improve behavioral energy efficiency
- Studied optimal electric vehicle charge scheduling from a hybrid systems perspective

**Cal Energy Corps Research Intern** | Academia Sinica, Taipei, Taiwan | Berkeley Energy & Climate Institute Jun - Aug '16

- Optimized organic, low-cost dye-sensitized solar PV cells to raise efficiency from 8 to 9%, improved stability through co-sensitization

**Undergraduate Research Apprentice** | Indoor Air Lab, Civil & Environmental Engineering, UC Berkeley Jan - Jun '16

- Investigated & modeled temperature effects on airflow patterns & mixing times of gaseous pollutants, under Prof. William Nazaroff
- Independently designed & completed pilot experiment studying ultrafine particle emissions from dust & hot surfaces

## PROFESSIONAL EXPERIENCE

**Artificial Intelligence (AI) Fellow** | MIT-Pillar AI Collective Jan - Jun '24

- Customer discovery to explore commercial applications of my research in timeseries forecasting & physics-informed ML for power systems
- Participated in the National Science Foundation (NSF) Innovation Corps (I-Corps) Spark and Fusion programs at MIT

**MIT Delegate & UNFCCC Observer** | COP28, Dubai, United Arab Emirates Oct - Dec '23

- Represented MIT & observed international negotiations at the 2023 United Nations Climate Change Conference of the Parties

**Thriving Earth Exchange Community Science Fellow** | American Geophysical Union (AGU) Jan '21 - Nov '23

- Worked with scientists, community leaders, legislators, gas & power utility representatives, environmental advocates, & local citizens
- GIS data collection, infrastructure planning, & environmental impact assessment to build an energy plan and GHG inventory for Otsego County, New York

**Energy Management Intern at DEW21 (Energy & Water Authority)** | Dortmund, Germany Jul - Aug '18

- Modeled & optimized hourly/daily price forward curves to predict natural gas prices in European markets, five years into the future

**Mechanical & Process Engineering Intern** | Applied Materials, Santa Clara, CA May - Aug '17

- Developed a more accurate, real-time & cost-effective method for monitoring levels of solid chemicals inside process chambers
- Drafted 3D models, detail drawings, collaborated with suppliers to implement alternative sensors & measurement techniques

**External Consultant** | BERC Innovative Solutions Consulting Jan '16 - Jun '17

- Electric Power Research Institute: Identified key drivers for H<sub>2</sub> production, storage, transport, & usage for iron & steel decarbonization
- Amazon Web Services: Analyzed technical, financial, & policy issues for battery storage (with renewables) in Amazon data centers

## TEACHING & MENTORSHIP

**AI/ML Lead Instructor** | MIT International Science & Technology Initiatives, Lima, Peru Oct '24 - Jan '25

- Develop and teach 3-week intensive course on machine learning and data science for early & mid-career professionals in Lima, Peru

**Technical Curriculum Developer & Lead Instructor** | MIT International Science & Technology Initiatives Nov '23 - Jan '24

- Developed curriculum & taught high school course on climate change, clean energy & decarbonization in South Africa & Botswana

**Data Science & Machine Learning Instructor** | MIT International Science & Technology Initiatives, Montevideo, Uruguay Jan '23

- Organized 3-week machine learning & entrepreneurship course at Universidad Tecnológica del Uruguay as part of MIT Global Startup Labs
- Developed & taught interactive lessons on neural networks, advanced deep learning methods, model validation, & hyperparameter tuning
- Mentored teams of students & professionals working on diverse applied ML startups & research projects

**Research Mentorship and Supervision** | MIT International Science & Technology Initiatives

- Danielle Knutsen (MIT undergraduate): Granular data curation & machine learning study for future DER-rich grid scenarios Sep '24 - present
- Peer Brigger (visiting master's student, ETH Zurich): Assessing the true marginal value of storage in the future decarbonized grid Apr '25 - present
- Luca Hartmann (visiting master's student, ETH Zurich): Distributed model predictive voltage control with circuit dynamics Sep '23 - Aug '24
- Jose Vargas (MIT undergraduate): Probabilistic forecasting of DER power injections & flexibility with uncertainty Sep '24 - Feb '25

## PUBLICATIONS

- Vineet Nair.** “Enhanced physics-informed neural networks and neural operators for transient simulations of high-order power grid dynamics”, Submitted, under review (2025).
- Vineet Nair**, Morteza Vahid Ghavidel, & Anuradha Annaswamy. “Dynamic resource coordination can significantly increase power grid hosting capacity to accommodate more renewables, storage, and electrified load growth.” In preparation for Joule (2025).

## PRESENTATIONS & TALKS

- Vineet Nair** & Anuradha Annaswamy. “Maximizing Security and Resilience to Cyber-attacks in a Power Grid.” MIT Energy Initiative Future Energy Systems Center Fall Workshop (2024).
- Vineet Nair.** “Towards a grittier grid: Data-driven decision-making for distributed energy resources.” Stanford University seminar (2024).
- Lucas Pereira, **Vineet Nair**, et al. “Machine learning-based time series forecasting for distributed energy resources in power grids to enhance resilience.” 18<sup>th</sup> Annual Graduate Climate Conference (2024)
- Vineet Nair.** “Data-driven distributed optimization, markets, and control for an IBR-rich grid edge.” NSF Workshop on Enabling Cyber-Resilient Distribution Systems with Edge Inverter-Based Resources (IBR), MIT (2024).
- Vineet Nair.** “Better Decision Making & Coordination for Future Power Grids.” Invited seminar at Universidad Politécnica de Madrid (2024).
- Vineet Nair** et al. “Hierarchical Local Retail Electricity Markets for Distributed Energy Resources.” IEEE Power & Energy Society General Meeting (PESGM 2023).
- Vineet Nair** & Anuradha M. Annaswamy. “Local retail electricity markets for grid services in DER-rich distribution systems.” Transactive Energy Theory Workshop, Pacific Northwest National Laboratory (PNNL) (2022).

Thomas Lee\*, **Vineet Nair\***, & Andy Sun. “Impacts of Dynamic Line Ratings on Security-Constrained Economic Dispatch for Transmission Grids & Wholesale Electricity Markets.” Technical Presentation to Federal Energy Regulatory Commission (FERC) (2022).  
**Vineet Nair**, & Anuradha M. Annaswamy. “Local Hierarchical Electricity Markets for Distribution Grid Services like Voltage Control.” Poster presentation at the NREL Fifth Workshop on Autonomous Energy Systems (2022).  
**Vineet Nair** et al. “Secure & Private Market-based Coordination of Grid Edge IoT Devices.” Invited presentation at INFORM 2021 Annual Meeting: Session on Data Analytics in Cyber-Physical Systems.

## HONORS & AWARDS

<b>Aarav Amar Bajpayee Memorial Prize for Graduate Student Societal Impact</b>   MIT Mechanical Engineering <i>For excelling in research with societal impact related to the Health of the Planet or Global Energy Sustainability.</i>	May '25
<b>Sigma Xi Scientific Research Honor Society Full Member</b>	Feb '25
<b>Stanford Energy Postdoctoral Fellowship Semi-Finalist</b>   Stanford University Precourt Institute for Energy	Dec '24
<b>Cyber-physical Human Systems (CPHS'24) Fellowship</b>   International Federation of Automatic Control (IFAC)	Oct '24
<b>Stanford University Postdoctoral Recruitment Initiative in Sciences and Medicine (PRISM) award</b>	Sep '24
<b>ARPA-e Energy Innovation Summit Student Program Award</b>   US Department of Energy	May '22, May '24
<b>National Science Foundation Innovation Corps (I-Corps) Spark and Fusion Grants</b>	May '24
<b>Conference Travel Grant Award</b>   MIT Graduate Student Council	Mar '24
<b>MIT-Pillar AI Collective Fellowship</b>   Pillar VC & MIT Deshpande Center for Technological Innovation	Dec '23
<b>Den Hartog Travel Award in Mechanics</b>   MIT Mechanical Engineering Department	Jan '23
<b>Out in STEM (oSTEM) Scholarship</b>   Berkshire Hathaway Energy Foundation	Oct '22
<b>Best Paper Award: 3<sup>rd</sup> Place</b>   54 <sup>th</sup> North American Power Symposium	Oct '22
<b>MIT MADMEC Sustainability Challenge: 2<sup>nd</sup> Place</b>   MIT Materials Science & Engineering Department	Oct '22
<b>NREL Workshop on Autonomous Energy Systems Travel Grant</b>   National Renewable Energy Lab	July '22
<b>Martin Family Society Fellowship for Sustainability</b>   MIT Environmental Solutions Initiative	Mar '22
<b>Runner up</b>   MIT Entrepreneurship & Maker Skills Integrator (MEMSI) Hardware Startup Bootcamp	Jan '22
<b>International Clean Energy Challenge Winner</b>   Upper Austria	Jul '19
<b>Ruhr Fellowship</b>   University Alliance Ruhr & TU Dortmund, Germany	Apr '18
<b>43rd Annual Business Today International Conference Impact Challenge Finalist</b>   Princeton University	Nov '17
<b>Robotics Institute Summer Scholars Acceptance</b>   Carnegie Mellon	May '17
<b>Smart Cities Innovation Collider Winner</b>   Sutardja Center, Pear.VC, Bosch, & City Innovate Foundation	Apr '17
<b>Dean's Startup Seed Fund Winner</b>   Haas School of Business, UC Berkeley	May '17

## LEADERSHIP, TEAMWORK & ACTIVITIES

<b>Co-Lead of Commonwealth Sustainable Energy Transition (CSET) Youth</b>	Jun '25 - present
<b>Board of Directors Member</b>   MIT Alumnx Pride	Apr '25 - present
<b>Finance lead</b>   MIT Global Startup Workshop (GSW), Warsaw, Poland	Oct '24 - Mar '25
<b>Impact Officer &amp; AI x Climate/Health Project Lead</b>   Global Shapers Cambridge Hub, World Economic Forum	Sep '23 - Apr '25
<b>Graduate Student Representative</b>   MIT Corporation Joint Advisory Committee on Institute-Wide Affairs	Aug '22 - Aug '23
<b>Co-President</b>   MIT Energy & Climate Club	Apr '22 - May '23
<b>Content &amp; Operations Team Member</b>   MIT Global Startup Workshop (GSW), Athens, Greece	Oct '21 - Mar '23
<b>Technical Research Seminar Organizer</b>   MIT International Science & Technology Initiatives (MISTI)	Sep - Nov '22
<b>Elite Summer School in Robotics, Automation &amp; Entrepreneurship</b>   Innovation Centre Denmark	Aug '22
<b>Co-Managing Director</b>   2022 MIT Energy Conference	May '21 - Apr '22
<b>Co-Director of Applicant Experience</b>   2021 Climate & Energy Prize (CEP) @ MIT	Sep '20 - Apr '21
<b>Young Professionals Affinity Group Team Lead</b>   Clean Energy for Biden (CE4B)	Jun - Nov '20
<b>Graduate Student Leadership Incubator Fellow</b>   MIT 2019-20 Cohort	Sep '19 - Sep '20
<b>Engage for Change Fellow</b>   Cambridge Hub & University of Cambridge Environment & Energy Team	Jan - Apr '19
<b>Undergraduate Student Representative At-Large</b>   The Green Initiative Fund, UC Berkeley	Aug '17 - May '18
<b>Project Manager &amp; Consultant</b>   Bay Area Environmentally Aware Consulting Network (BEACN)	Sep '15 - May '18

## PROJECTS

<b>Selected Programming &amp; Computational Projects</b>   UC Berkeley, University of Cambridge, MIT	Jan '18 - present
<ul style="list-style-type: none"> <li>Implemented novel convex relaxations to solve the mixed-integer power grid reconfiguration optimization problem</li> <li>Used natural language processing &amp; deep neural networks for future stock price predictions based on textual news data</li> <li>Extended sparse regression techniques to discover partial differential equations &amp; denoised data via dynamic mode decomposition</li> <li>Implemented a numerical model in MATLAB to simulate traffic flows on highways &amp; mitigate congestion</li> <li>Wrote a finite-element, computational fluid dynamics program from scratch in Fortran to analyze compressible flow through pipes</li> <li>Developed finite state machine model based on hybrid systems theory to optimally schedule &amp; coordinate EV charging along highways</li> <li>Implemented various Java data structures to build a basic version of Google Maps, an auto grader, &amp; an interactive, 2D game</li> </ul>	

- Designed & built an automated, voice-controlled coconut processor as part of senior year capstone mechatronics project
- Designed & built a voice-controlled, miniature car using Python, Arduino, & proportional control schemes in negative feedback
- Designed feedback control systems for magnetic levitation & a self-erecting inverted pendulum, implemented via MATLAB/Simulink
- Designed & 3D printed a mini-windmill to maximize structural strength & stability, built control system for optimal power output
- Designed & prototyped versatile, kinetic lighting structures based on tensegrity soft robots with programmable motion & color schemes
